

Passenger safety is our top priority

BLÜCHER®

KEEPING UP THE FLOW

- 👤 Prevent the spread of fire upwards and downwards
- 👤 No burning droplets
- 👤 No toxic gasses or smoke in case of fire

STAINLESS STEEL DRAINAGE SYSTEMS

BLÜCHER provides safety on board

If a fire occurs at sea, you cannot just call the fire brigade. To prevent fire spreading and damage caused in the event of fire, it is important to consider the elements of the ship that penetrate various fire compartments. This includes the drainage system.

BLÜCHER has more than 30 years' experience in sanitary discharge systems for cruise ships. The company's stainless steel drainage system can provide a complete and non-combustible solution.

BLÜCHER's products are complete in stainless steel, fire-tested according to IMO standards and approved to A0, A30 and A60. Stainless steel is a non-combustible material and in the event of fire, it will prevent the spread of fire, both upwards and downwards, as it does not melt.

In many cases, the smoke is just as, if not more, dangerous than the fire. BLÜCHER's stainless steel system will not contribute to this, as it does not release any toxic gasses or smoke.

BLÜCHER pipes and fittings can be used for black and grey water drainage as well as for deck and outside piping, both above and below freeboard deck. The sanitary discharge system has been installed in more than 2,500 vessels worldwide, ranging from cruise liners and luxury yachts to naval vessels and offshore facilities.

Passenger safety is our top priority

- 🔥 Prevent the spread of fire upwards and downwards
- 🔥 No burning droplets
- 🔥 In case of fire no toxic gasses or smoke
- 🔥 A complete and non-combustible solution in stainless steel
- 🔥 Fire-tested according to IMO standards
- 🔥 Penetrations approved to A0, A30 and A60

BLÜCHER®

At BLÜCHER® more than 330 employees create an annual turnover of more than 60 million euro.

Through know-how, dedicated service and common sense we develop, produce and market high quality stainless steel drainage solutions for customers within the housing, commercial, industrial and marine sectors all over the world.
